

PART-TIME BEHAVIOURAL ECONOMICS RESEARCH ASSISTANT (5 HRS / WK)

This position is ideal for: A Master's (or advanced Bachelor's) in Economics student currently enrolled at [York University](#), who is interested in research and potentially considering a PhD in Economics.

Pay: \$1,500 for 65 hours (5 hours per week, for approximately 13 weeks). Working weeks are flexible.

Location: Virtual, based at Schulich School of Business, York University; Toronto, Canada

Deadline: October 7, 2022

Supervisor: [Alexander Coutts](#)

I am looking for a motivated individual to work as a part-time research assistant on specific tasks which encompass two or three research projects in the field of behavioural economics.

The planned duration is from **October 2022 – January 2023**, however the specific working weeks are flexible.

This position offers the opportunity to gain exposure to the field of behavioural economics and academic research. It will involve reviewing current and past literature, and performing data analysis using Stata.

Qualifications

Required:

- (i) be currently enrolled at **York University** pursuing a degree in **Economics** or a related field (e.g. Psychology);
- (ii) interest in behavioural/experimental economics.
- (iii) some familiarity with reading academic journal articles in economics.

Bonus:

- (i) Proficiency programming in Stata;
- (ii) Prior experience on research projects and/or RA work;
- (iii) Programming experience (e.g. JavaScript / Python / text analysis).

If interested, please prepare a:

- CV
- [*Optional*] One-paragraph statement describing your interest in behavioural economics.

Please submit your application to acoutts@schulich.yorku.ca, with subject: **ECONRA2022**

If you would like further information about this opportunity, or are uncertain whether your profile is a good fit, feel free to email the above email address with your inquiry.
